PUMPS, THE HEART OF INDUSTRY

A look inside the incredible machinery that keeps our lives running.

Pumps lie deep in the heart of every process. Our factories, plants, pipelines, mills all operate using pumps—and so do our bodies. Join us in celebrating Pump Appreciation Day and help recognize pumps both as the heart of industry and as the invaluable organ that powers life.

PUMPPRECIATIONDAY.COM

WE HAVE A HEART.
ITT Goulds Pumps promotes CPR and first aid training around the world through the Emergency Cardiovascular Care Program, supported by the American Heart Association and its global partners. Because pumps are the "heart of industry," ITT Goulds Pumps recognizes the importance of a healthy heart and invites industrial pump users worldwide to join its commitment to heart health.

9 billion
ITT employs more than 9,000 people who will collectively pump 9 billion barrels of blood during their lifetimes.

1.4 trillion
Nearly 1.4 trillion barrels of oil are extracted, refined and transported each year by pumps.

2000 B.C.
The first form of a pump, called a shadoof, was created by the Egyptians in 2000 B.C.

1.900 gallons
As the largest artery in the body, the aorta is almost the diameter of a garden hose and pumps more than 1,900 gallons (7,200 liters) of blood per day.

In one day, your blood travels a total of 12,000 miles (19,312 kilometers)—that’s three times the distance from the U.S. to Ireland.

150,000 gallons
The world’s largest water pump measures 32 feet tall by 225 feet wide and can move more than 150,000 gallons (567,812 liters) of fluid per second.

During construction of the Burj Dubai Tower, concrete was pumped to a record height of 1,988 feet (606 meters)—longer than six fields in World Cup football.

As the largest artery in the body, the aorta is almost the diameter of a garden hose and pumps more than 1,900 gallons (7,200 liters) of blood per day.

Research shows that eating dark chocolate can actually reduce your risk of heart disease, heart attacks and heart failure.

1982
The first artificial heart was successfully implanted in 1982. The surgery lasted more than seven hours and was valued at $50,000.

1982
The first artificial heart was successfully implanted in 1982. The surgery lasted more than seven hours and was valued at $50,000.

The Hershey Company uses service pumps to help produce nearly 80 million chocolate kisses per day.
